Diesel Engine Classifications. Diesel engines are classified according to their cycle, either two-stroke or four-stroke, or speed. Slow speeds are any where the engine has a maximum speed of 300 rpm. The largest and most powerful engines in the world tend to be slow-speed, two-stroke engines. Medium-speed engines operate between 300 and 1,000 rpm.

These are part of a government-led crusade to tackle air pollution, which is hitting diesel owners in the wallet. As well as charging zones, many councils are introducing diesel parking surcharges of up to 50% - even for the cleanest cars, and there have been increases in car tax and company car tax for some diesels.. It's no wonder that diesel car sales are down dramatically compared with a ...
