Solving quadratic equations can be difficult, but luckily there are several different methods that we can use depending on what type of quadratic that we are trying to solve. The four methods of solving a quadratic equation are factoring, using the square roots, completing the square and the quadratic formula.

To solve an exponential equation, take the log of both sides, and solve for the variable. Example 1: Solve for  $x$  in the equation . Solution: Step 1: Take the natural log of both sides: Step 2: Simplify the left side of the above equation using Logarithmic Rule 3: Step 3: Simplify the left side of the above
