The thick, branched taproot can be up to 2-3 cm in diameter and grow up to 1-2 m in length (von Hofsten, 1954; Solbrig, 1971). The lateral roots are arranged in two rows that wind clockwise downward in a loose spiral around the root and are distributed more or less regularly along its length (Gier and Burress, 1942).

Twin-lead cable is a two-conductor flat
cable used as a balanced transmission

Where To Download Antenna Compendium Volume 3

line to carry radio frequency (RF) signals. It is constructed of two stranded or solid copper or copper-clad steel wires, held a precise distance apart by a plastic (usually polyethylene) ribbon. The uniform spacing of the wires is the key to the cable's function as a transmission line; any abrupt changes in spacing ...

Twin-lead - Wikipedia

The third volume of a four-volume set of the most comprehensive and up-to-date coverage of the advances of petroleum refining designs and applications, written by one of the world's most well-known process engineers, this is a must-have for any chemical, process, or petroleum engineer.

Ion-attachment ionization is similar to chemical ionization in which a cation is attached to the analyte molecule in a reactive collision: $M + X^+ \rightarrow [M \cdot X]^+$ Where M is the analyte molecule, X⁺ is the cation and A is a non-reacting collision partner.. In a radioactive ion source, a small piece of radioactive material, for instance ⁶³Ni or ²⁴¹Am, is used to ionize a gas.

A rust monster was a creature that corroded and ate metal. They were favored by the Mulhorandi god Geb, the dwarven god Abbathor, the gnomish god Flandal Steelskin, and the Duergar gods Laduguer and Deep Duerra. A rust monster was the size of a small pony, with four insectlike legs and a squat, humped body. Its hide was thick and lumpy and was yellowish tan on the belly and rust-red on the ...
