Chapter 11

Cell Communication 1.  
What is a signal transduction pathway?  
A signal transduction pathway is the series of steps by which a signal from outside the cell is converted (transduced) into a functional change within the cell. 2.

Communication

Lecture Outline .

Overview: The Cellular Internet. Cell-to-cell communication is absolutely essential for multicellular organisms. Cells must communicate to coordinate their activities.

Communication between cells is also important for many unicellular organisms.
