What is the difference between density and dispersion? The density of a population is the number of individuals per unit area or volume. ...

Chapter 53: Population Ecology - Biology E-Portfolio Below is a list of chapters from the Campbell's Biology, 8th Editon textbook that we have slides for. These slides will cover all of the key points of the chapter and will be useful when $\frac{1}{Page} \frac{1}{10}$

studying for the AP Biology exam or any other Biology test.

Campbell's Biology, 8th Edition | CourseNotes

You may recall from Chapter 54 that biomass is the total mass of all individuals in a trophic level. Another way of defining net primary production is as the amount of new biomass added in a given period of time. Why is net primary production, or the amount of new biomass/unit of time, the key measurement to ecologists?
