App Inventor is a cloud-based tool, which means you can build apps for Android or iOS devices right in your web browser. This website offers all the support you'll need to learn how to build your own apps. Visit it at ai2.appinventor.mit.edu. You can get there by clicking the orange "Create Apps!" button from any page on this website.

Getting Started with MIT App Inventor

MIT App Inventor is changing how the world creates apps and how kids learn about mobile computing. Over 400,000 active inventors a month from 195 countries have created more than 22 million apps. MIT App Inventor now brings that same power and simplicity of app creation to the Internet of Things (IoT) and the universe of connected devices.

MIT App Inventor + Internet of Things

The App Inventor team was led by Hal Abelson and Mark Friedman. In the second half of 2011, Google released the source code, terminated its server, and provided funding to create The MIT Center for Mobile Learning, led by App Inventor creator Hal Abelson and fellow MIT professors Eric Klopfer and Mitchel Resnick.
