In architecture, and specifically in Gothic architecture, a gargoyle (/ˈɡɑːrɡɔɪl/) is a carved or formed grotesque: 6-8 with a spout designed to convey water from a roof and away from the side of a building, thereby preventing rainwater from running down masonry walls and eroding the mortar between. Architects often used multiple gargoyles on a building to divide the flow of ...

A number of books have been written about the architecture of various indi-vidual Caribbean islands, some in considerable detail. What has not been previ-ously accomplished is to put within one cover a well-illustrated work that de-scribes the significant historic architecture of this entire area. That is the goal of this book.

Historic architecture in the Caribbean Islands

The Column of Trajan, built in 113 A.D. to commemorate the Roman emperor Trajan’s victories against the Dacian tribes of the lower Danube, contains a continuous frieze a yard wide and 218 feet long in which more than 2,500 human figures as well as hundreds of boats, horses, vehicles, and pieces of military equipment are depicted.

Historic City of Vigan. Established in the 16th century, Vigan is the best-preserved example of a planned Spanish colonial town in Asia. Its architecture reflects the coming together of cultural elements from elsewhere in the Philippines, from China and from Europe, resulting in a culture and townscape that have no parallel anywhere in East and South-East Asia.
