Global Production Networks Theorizing Economic

Production in the global economy has undergone a qualitative shift towards a spatially more dispersed and organizationally more fragmented form. Contemporary production of goods and services in many sectors can best be envisioned as networks, which consist of multiple economic actors interconnecting multiple locations in a highly complex fashion.

Global production networks: theorizing economic ...

Accelerating processes of economic globalization have fundamentally reshaped the organization of the global economy towards much greater integration and functional interdependence through cross-border economic activity. In this interconnected world system, a new form of economic organization, termed global production networks (GPNs) in this book, has emerged that brings together a wide array ...

Global Production Networks: Theorizing Economic ...

The global production networks that are the subject of Coe and Yeung's analysis are governed by global corporations, sometimes singularly, sometimes collectively in ways that are directly analogous to the more 'normal' institutions of global governance (see my blog for Progress in Political Economy. While the authors may not completely subscribe to such a perspective, their new study ...
