TUTORIAL: NETCONF
AND YANG The

Meaning of

Transactions The four
properties that define a
transaction: ACID

Atomicity •

Transactions are
indivisible, all-or-

nothing Consistency •

Transactions are all-at-
once • There is no

Download Free Netconf And Yang Status Tutorial

internal order inside a transaction, it is a set of changes, not a sequence

- Implies that { create A, create B } and { create B, create A } are identical
- Implies that a system behaving differently with respect to the sequence is not transactional

Independence ...
