Bone Metastasis | ZERO - The End of Prostate Cancer

Due to lack of mechanical pressure on the bone, bone mass is lost at a rate of one and a half percent in just one month in a zero-gravity environment, compared to about three percent a decade in a healthy person in a normal environment. The mass loss mainly affects the lower vertebrae of the spine, the hip joint and the femur.

After witnessing a mob hit, surgeon Jack Francisco is put into protective custody to keep him safe until he can testify. A hitman known only as D is blackmailed into killing Jack, but when he tracks him down, his weary conscience won't allow him to murder an innocent man. Finding in each other an unlikely ally, Jack and D are soon on the run from shadowy enemies. Forced to work together ...

Zero at the bone (Yaoi) manga - Mangago

Weakening of the bones due to the progressive loss of bone mass is a potentially serious side-effect of extended spaceflight. Studies of cosmonauts and astronauts who spent many months on space station Mir revealed that space travelers can lose (on average) 1 to 2 percent of bone mass each month.

Space Bones | Science Mission Directorate

Weightlessness is the complete or near-complete absence of the sensation of weight. This is also termed zero-G, although the more correct term is "zero G-force". It occurs in the absence of any contact forces upon objects including the human body. Weight is a measurement of the force on an object at rest in a relatively strong gravitational field (such as on the surface of the Earth).

Weightlessness - Wikipedia

This results in a loss of bone tissue approximately 1.5% per month especially from the lower vertebrae, hip, and femur. Due to microgravity and the decreased load on the bones, there is a rapid increase in bone loss, from 3% cortical bone loss per decade to about 1% every month the body is exposed to microgravity, for an otherwise healthy adult ...

Effect of spaceflight on the human body - Wikipedia

Choose your zero distance. As a round flies downrange, it travels in an arc. Think of the round you fire as a football. It travels upward slightly before arcing and traveling back downward. The distance you choose to zero the rifle at will determine what portion of the arced flight path the round impacts the target on.
